

EMAIL AND TWITTER AND FACEBOOK, OH MY!

THE IMPACT OF SOCIAL MEDIA ON EMPLOYMENT PRACTICES

COMPLIMENTARY SEMINAR

In this complimentary seminar, we will discuss the do's and don'ts in the ever-changing world of social media technology in order to avoid legal issues. A recent case filed in Connecticut, in which a woman was terminated after posting critical remarks about her supervisor on Facebook, may be precedent-setting, as this is the first case in this evolving area. As more cases of this type inevitably arise, it will become increasingly important for employers, managers and attorneys to understand how developments in social media can affect employment law. This seminar covers the following topics:

- Employer's use of social media such as Facebook and Google for pre-employment investigation
- The types of investigation allowed for pre-employment, and authorizations needed
- Employer's use of social media post-employment – what actions an employer can take if objectionable material is found on blogs or Facebook
- The use of employee's email and what an employer is allowed to search
- Policies an employer may have regarding off-duty conduct
- Updating of employee handbooks to cover such conduct and possible harassment concerns
- Employee policies dictating how supervisors interact with subordinates online, as well as via text and email

Presented by: Scott A. Freedman, Esq.
Morris Polich & Purdy LLP
