Two Morris Polich & Purdy Partners Published in Construction & Design Related Books

Los Angeles, CA --- The California and Nevada law firm Morris Polich & Purdy LLP is pleased to announce that two of its attorneys have recently contributed to two notable construction and design related books.

Partners Theodore D. Levin Esq., P.E. and Mehrdad Farivar Esq., FAIA co-authored a chapter for *Design Professional and Construction Manager Law**, in which they analyze the contractual responsibilities of design professionals in all phases of a construction project. The overall publication discusses the legal considerations that design professionals and construction managers face in their daily practices.

Mr. Levin was also a contributor to the publication *Construction Law Litigation Strategies***, authoring a chapter entitled "Avoiding Problems and Solving Disputes in Construction Law," where he advises on topics such as construction risk-management, litigation strategy and determining clients' needs. Mr. Levin also provides discussion on the technical aspects of construction litigation, including the legal and financial repercussions faced by those involved in the construction industry.

"Our goal in contributing to these books was to utilize our extensive experience within the construction & design industry to provide a unique perspective on the legal system that serves it," said Mr. Levin.

About MPP
